◉ Objective

Aspiring Machine Learning Engineer with a passion for building data-driven applications. Looking to contribute to innovative AI projects and grow as a developer.

⚒ Skills

- Python, SQL, Git, Bash

- Machine Learning, Deep Learning, NLP

- TensorFlow, Scikit-Learn, OpenCV

- Flask, REST APIs, Docker

- Data Visualization: Matplotlib, Seaborn

🗄 Education

Bachelor of Technology in Computer Science

XYZ University – 2021–2025

CGPA: 8.7 / 10

💼 Projects

Face Mask Detection System

- Used OpenCV and CNN to detect masks in real-time using webcam input.

- Achieved 94% test accuracy with data augmentation.

Resume Analyzer AI

- Built an NLP-based system to match resumes to job descriptions.

- Technologies used: Flask, SpaCy, PDFMiner.

🌐 Certifications

- Deep Learning Specialization – Coursera

- Google Data Analytics Certificate – Coursera

🗁 Internships

Data Science Intern – ABC Analytics

- Built dashboards using Python and Power BI

- Cleaned and analyzed large datasets from e-commerce platforms

---

👥 Languages

English, Hindi

🤝 Extracurriculars

- AI Club Member – Organized ML workshops for juniors

- Hackathons – Finalist in Hack the Future 2024
